
CONTRACT: SOFTWARE DEVELOPMENT PROJECT - CLINICAL CASE MANAGEMENT PLATFORM

This contract is for a SOFTWARE DEVELOPMENT project that is specified as a digital “Clinical Case Management Platform.”

This Software Development Contract (the "Contract") is entered into as of 1st September 2026, (the "Effective Date"), by and between:

- CODESPHERE INNOVATIONS (U) LIMITED (the “Developer”), a company incorporated under the laws of Uganda, with its principal place of business at Kampala and;
- Persons Dr Oluwadamilola A. T. Haastrup AND Dr Oluwatosin O. O. Haastrup (both Persons being “the Client”);
- The Developer and the Client are collectively referred to as the “Parties.”

The ‘Project’ is the digital Clinical Case Management Platform (with mobile application for iOS/android); also interchangeably referred to as CCMP or the ‘work product’ or the ‘product’.

This contract is between Dr Oluwadamilola A. T. Haastrup and Dr Oluwatosin O. O. Haastrup (the Client) and Mr Ivan Akandwanaho and Codesphere Innovations (U) Limited, (the Developer).

1. SERVICES AND SCOPE OF WORK

The Developer agrees to provide professional software engineering services for the design, development, and deployment of a digital Clinical Case Management Platform (the "Project"). The scope of services shall include the following phases as outlined in the project quotation:

- Requirements Engineering & Technical Architecture: Defining functional specifications and system design.
- UI/UX Design & Prototyping: Development of user-flow planning, interface architecture, and responsive layouts.
- Full-Stack Software Engineering: Construction of the frontend application, backend/API services, and database architecture.
- Quality Assurance & Validation: Comprehensive functional, security, and performance testing.
- Deployment & Launch: Orchestrated production environment setup and stakeholder onboarding.

2. FEES AND DISBURSEMENT ARCHITECTURE

The total payment for the Project/Work Product is 12,000 USD (Twelve Thousand United States Dollars). This amount excludes third-party infrastructure and maintenance fees AFTER the completion of “the project”/ “the work product”: 2,000 USD over the first two years following the launch of the product and the start of maintenance of the digital platform including the mobile app. The Client will pay another 2,000USD in the third year for maintenance. These fees

are subject to separate billing. The 12000 USD payments for the work product shall be disbursed according to the following milestone schedule (further specification of the phases are detailed in the “_Clinical Management Platform” sent by the Developer on Aug 21/08/2026 20:37):

Milestone	Description	Percentage	Amount (USD)
Phase 1-2 (1.5wks)	Discovery & Technical Roadmap; Visual Architecture & UX Modeling	33.33%	\$4,000
Phase 3-4 (2.5wks)	Core Sprint & Logic Construction; System Integration & Optimization	33.33%	\$4,000
Phase 5-6* (1wk)	Validation, QA & Compliance Audit; Deployment & Stakeholder Onboarding	33.34%	\$4,000

*** Project Completion & Handover**

3. PROJECT TIMELINE

The estimated duration for the completion of the Project is 5 Weeks from the date of commencement. This timeline is contingent upon the timely provision of requirements, branding assets, and feedback by the Client.

3.1 Project, Scheduling and Payment.

The Client is hiring the Developer to do the following: a Create the CCMP with Mobile Application. This will also include the maintenance period as agreed which is a minimum of three years after the CCMP with mobile application is launched.

3.2 Schedule.

The Developer will begin work on **receipt of the signed contract from both parties** and will continue the work till completed - an anticipated 5-week period. This contract may be terminated by either the Client or Developer at any time pursuant to the terms of section ‘**Term and Termination.**’

3.3 Payment.

The Client will pay the developer 12,000USD for completed work and 2,000USD over the initial two years of the maintenance of the CCMP and app. The Client will pay another 2,000USD in the third year for maintenance. The source code and full unrestricted rights and access will be given

to the client without prejudice on completion of the product and even before any maintenance is required. This includes any updates/amendments through the maintenance phase.

Any updates or amendments through the maintenance phase, will also be handed over to the clients as soon as the updates are complete. Should the client wish to continue maintenance with a different service/developer, the updated source code with any later amendments after completion will be given to the client in its entirety by the developer.

4. OWNERSHIP AND LICENSES

4.1 *Client owns all work product.*

The Developer is creating “work product” for the Client which is the finished product as well as drafts, notes, materials, mock-ups, hardware, designs, inventions, patents, code and anything else that the developer works on. That is, all that is conceived, created, designed, developed, invented, worked on or reduced to practice as part of this project. Whether before the date of this contract or after the Developer assigns the work product to the Client. This means the Developer is giving the Client all of its present and future right, title, interest in and to the work product (including intellectual property rights), and the client will be the sole owner of it. The Client can use the work product however they want or can decide not to use the work product at all. The Client, for example, can modify, destroy or sell it, as they see fit. Accordingly, the Developer should not register nor attempt to register any intellectual property rights in the work product unless requested to do so by the Client.

4.2 *Developers use of work product.*

Once the Developer assigns the work product to the Client, the Developer does not have any rights to it, except those that the Client explicitly gives the Developer. The Client may give permission to use restricted portions of the work product as part of portfolios and websites so long as it is to showcase the work and/or the client in a positive light, and not for any other purpose. The Client does not give permission to sell or otherwise use the work product to make money, or for any other commercial use.

Intellectual Property (IP) Ownership

- All work is a "work made for hire" under copyright law, meaning it belongs to the Client from creation. The developer "irrevocably assigns, transfers, and conveys to the Client, all right, title, and interest" worldwide in the code, designs, and deliverables. The developer cannot use, re-license, or incorporate any part of the work into open-source or other client projects.

Confidentiality and Data Protection

- The developer must handle all proprietary Information, including source code, ideas, and project files with the sensitivity of trade secrets. The developer must permanently delete and hand over all copies of the code and data immediately upon project completion or contract termination. The developer may retain a copy of source code information and other data directly necessary for maintenance through the period of the maintenance relationship. This must be handed over similarly on completion of the maintenance phase.

4.4 Developers help securing ownership.

The Developer agrees to fulfil the obligation to demonstrate the Client's ownership of the work product, wherever this is required. For example, the Client may require the Developer to sign a copyright assignment and the Developer shall do this. In the event that the Client is unable to reach the developer in reasonable time acceptable to the client, the Developer agrees that the Client will act on behalf of the Developer to secure ownership. The following language gives the Client that right: if the Client cannot contact the Developer for any reason, the client is designated and conclusively appointed as the Developer's agent and attorney-in-fact, to act for the Developer and on the Developer's behalf to execute, verify and file the required documents, and to take any other legal action to accomplish the purposes of the paragraph headed 'Ownership and licenses.'

4.5 Developers IP that is not work product.

During the course of this project the Developer might use intellectual property (IP) that the Developer owns or has licensed from a third-party but that does not qualify as "work product." This is called background IP and the parties agree during the project what intellectual property constitutes "work product" and what intellectual property constitutes "background IP." The Developer is not giving the Client this background IP. But, as part of the contract, the Developer is giving the Client a right to use and license (with the rights to sublicense) the background IP to develop, market, sell, and support the Client's products and services. The Client may use the background IP worldwide and free of charge, but they cannot transfer their rights to the background IP (except as allowed in section 13.1. titled 'Assignment'). The Client cannot sell or license the background IP separately from their product or services. The developer cannot take back this grant, and this does not end when the contract is over or otherwise terminated.

4.6 Developer's right to use client IP.

The Developer may need to use the Client's intellectual property to do its job. For example, if the Client is hiring the Developer to build a website, the Developer may have to use the Client's logo. The Client agrees to let the Developer use the Client's intellectual property and other intellectual property that the Client controls to the extent reasonably necessary to do the Developer's job on the Clients project. Beyond that, the Client is not giving the Developer any intellectual property rights.

4.7 Moral rights/Overreach

As this product is the intellectual property of the client:

- the Developer may not claim any existing and/or future authorship, or other rights to the work product, or object to the way the Client uses the work product.
- The Developer may not claim any moral rights in the work product. While the Client must not misattribute the product to the work of a third party, the developer may not demand acknowledgement on marketing or other product use.

5. NON-SOLICITATION AND NON-COMPETE CLAUSE

Until this Contract ends, the Developer will not: (I) encourage Client employees or service providers to stop working for the Client; (II) encourage the Client's customers or clients to stop doing business with the Client; or (III) hire anyone who worked for the Client over the 12-month period before the Contract ended. (IV) The Developer agrees that it will not do anything in this paragraph on behalf of itself or a third-part. This includes building competing products during and up to a minimum of 12 months after the work relationship.

6. COMPETITIVE ENGAGEMENTS

The Developer will not work for a competitor of the Client as specified in 'Non-Solicitation and Non-Compete clause' section. To avoid confusion, a competitor is any third-party that develops, manufactures, promotes, sells, licenses, distributes, or provides products or services that are substantially similar to the Client's products or services. A competitor is also a third-party that plans to do any of those things. The one exception to this restriction is if the Developer asks for permission beforehand and the Client agrees to it in writing. If the Developer uses employees or subcontractors, the Developer must make sure they follow the obligations in this paragraph, as well.

The Developer agrees not to use any Confidential Information, proprietary source code, or trade secrets of the Company to directly or indirectly benefit any third-party competitor, or to build a substantially similar competing product or service for the period specified in 'Non-Solicitation and Non-Compete' clause.

7. REPRESENTATIONS

7.1 Overview.

This section contains important commitments between the parties.

7.2 Authority to sign

Both parties, the Developer and the Client, agree that they have the requisite/corporate and, individual power and authority to enter into this Contract, and to perform all of the obligations under this contract.

7.3 Developer has rights to give clients work product.

The Developer *agrees* that the Client owns the work product, that the Developer is able to handover the work product to the Client, and that no other party will claim that it owns the work product. If the Developer uses employees or subcontractors, who become involved in work product development in any capacity, the Developer also commits that these employees and subcontractors have signed contracts with the Developer giving the Developer any rights that the employees or subcontractors have related to the Developer's background IP and work product.

7.4 Developer will comply with laws.

The developer guarantees that the manner it executes and delivers this work product including any background Intellectual property (IP) use complies with all applicable laws and regulations, in territories relevant to the use of the services under this contract.

7.5 Work product does not infringe.

The developer *agrees* that (I) its work product does not and will not infringe on any other individual's or organisation's intellectual property rights; (II) the developer has the right to let the client use the background IP, and; (III) this contract does not and will not violate any contract that the developer has entered into or will enter into with any other individual, organisation or party.

7.6 Service standard.

The developer will perform work under this contract with all due skill, care and ability.

7.7 Client premises.

To the extent that the Developer is required to work at the Client's premises, the developer shall comply with the health and safety policies and procedures notified to it by the client.

8. TERM AND TERMINATION

This contract is ongoing through the period of engagement with the developer, including the period of software maintenance and any ongoing product development with the developer thereafter. The Client may terminate this Contract by sending an email or letter to the developer, informing the recipient that the sender is ending the Contract and that the Contract will end in 30 days. This would usually be where there has been a breach in contract or other reason, including gross misconduct. The Contract officially ends once the time has passed. The developer may terminate the contract under the same conditions, and is required to give a full refund to the client, of any monies paid where termination is before handover of the completed product including the source code. The party that is ending the contract must provide notice by taking the steps explained in section 13.4. The Developer must immediately stop working as soon as they receive the notice of termination from the client, unless the notice says otherwise. The client will pay the developer for the work done up until the contract was ended. The following do not end, even after the contract ends: **'ownership and license,' 'competitive engagements,' 'non-solicitation,' 'representations,' 'confidential information and data protection,' 'limitation of liability,' 'indemnity' and 'general.'**

9. INDEPENDENT CONTRACTOR

The Client is hiring the developer as an independent contractor. The following statements accurately reflect the relationship:

- I. The Developer will use their own equipment, tools, and materials to do the work;
- II. The Client will not control how the job is performed on a day-to-day basis rather Developer is responsible for determining when, where, and how it will carry out the work;
- III. The Client will not provide the developer with any technical training. The Client will not be obliged to provide the Developer with any training;
- IV. The Client and Developer do not have a partnership, principal agents, employee or employer-employee relationship;

- V. The Developer cannot enter into contracts, make promises or act on behalf of the Client;
- VI. The Developer is responsible for their own taxes;
- VII. The Client will not make compensation on behalf of the Developer, or any of the Developer's employees, or subcontractors.

10. CONFIDENTIAL INFORMATION AND DATA PROTECTION

10.1 Overview.

This contract imposes special restrictions on how Client and the Developer must handle confidential information. These obligations are explained in this section.

10.2 The Client's confidential information.

The developer may come across, or be given client information that is confidential. This may include customer lists, business strategies, research and development notes, statistics about the website, and other information that is private. The developer may use this information according to UK GDPR and the Data Protection Act 2018 to perform agreed work under this contract, but not for anything else. This GDPR governance pertains to lawful processing, transparency, data minimisation, security, data breaches, individual rights, and international transfers. For example, if the client lets the developer use a customer list to send out a newsletter, the developer cannot use those email addresses for any other purposes. If the work relationship between the client and the developer ends either by completion of term or termination of contract, the developer must return or destroy all confidential information, and confirm this with the client accordingly. The developer must not share confidential information with any third-party without verified confirmation from the client by email and WhatsApp messaging.

The Developer's responsibilities only stop if the developer can show any of the following: (I) that the information was already public when the developer came across it; (II) a third-party provided the developer with the information without requiring that the developer keep it a secret; or (III) the developer created the information on its own without using any belonging to the client.

10.3 Third-party confidential information.

The clients or the developer may have access to confidential information that belongs to a third party. Neither the client nor the developer may share third-party confidential information unless there is written confirmation from the third party that has agreed this. The developer must inform the client if it knows of any special restrictions regarding third party information. The developer may not share third party information externally without client agreement.

10.4 Data protection

Each party shall comply with the relevant obligations under the UK data protection act 2018 and associated codes of practice when processing personal data in connection with this contract.

11. LIMITATION OF LIABILITY

Each party's aggregate liability to the other party under or in connection with this Contract shall not exceed the total fees paid or payable to the Developer under this Contract. Notwithstanding

the foregoing, each party's liability arising under or in connection with the sections 'Ownership and License,' 'Confidentiality,' and 'Data Protection' shall be unlimited. Should the Developer breach the confidentiality agreement, the Developer shall be liable to the client for any loss of profits, business revenue, goodwill and anticipated savings or for any indirect or consequential loss.

12. INDEMNITY

The Developer shall indemnify, defend, and hold harmless the Client, its Affiliates, and each of their respective directors, officers, employees, and agents from and against all liabilities, losses, damages, costs, and expenses (including reasonable attorneys' fees) arising out of or in connection with any third-party claim, action, or proceeding resulting from or relating to: (i) the Work performed by the Developer under this Contract; (ii) any breach by the Developer of its obligations under this Contract; or (iii) any breach by the Developer of the representations and warranties set out in Section 5 (Representations).

12.1 Developing indemnity.

In this contract, the client agrees to indemnify the developer against liabilities, that is, direct proven losses damages or expenses related to a third-party claim proceeding arising out of a deliberate breach by the client of its obligations under this contract.

12.2 Conduct of claims.

The party seeking indemnity must tell the other party promptly, and must not (I) admit liability; (II) make any admission of liability, or otherwise compromise or settle the claim without the prior written consent of the Indemnifying Party. The party seeking indemnity must provide all such information, assistance, and cooperation necessary for indemnity to the indemnifying party.

13. GENERAL

13.1 Assignment.

This conduct applies only to the clients and the developer. The developer cannot assign its right or delegate its obligations under this contract to third-party.

13.2 Mediation.

If a dispute arises about this contract, the parties first must try to settle it through mediation. The parties will agree to the mediator and share the cost of the mediation. Each party agrees to cooperate with the mediator and to try to reach a mutually satisfactory compromise.

13.3 Modification; Waiver.

Any contract modifications are validated only by a dated updated of the current contract signed by both the Client and Developer. Neither party can waive its rights unless the Client releases the Developer from its obligations under this contract. The waiving party (the Client), will acknowledge it's doing so in writing with a signed and dated confirmation.

13.4 Notices.

Over the course of this contract, one party may need to send a notice to the other party. For the notice to be valid, it must be in writing and delivered in one of the following ways: personal delivery/messaging/SMS, email or certified or registered mail (postage prepaid, return receipt requested). To avoid confusion, valid notice is considered received as follows: (I) if delivered personally, it is considered received immediately; (II) if delivered by email together with SMS or WhatsApp messaging, it is considered received. (III) if delivered by registered or certified mail (postage prepaid, return receipt requested), it is considered received upon receipt as indicated by the date on the signed receipt. If a party refuses to accept notice or notice cannot be delivered because of a change in address for which new notice was not given, then it is considered received when done electronically as above.

13.5 Severability.

This section deals with what happens if a portion of the contract is found to be unenforceable. If that's the case, the unenforceable portion will be changed to the minimum extent necessary to make it enforceable, unless that change is not permitted by law, in which case the portion will be disregarded. If any portion of the contract is changed or disregarded because it is unenforceable the rest of the contract is still enforceable.

13.6 Third Party Rights.

A person who is not a party to this Contract shall not have any rights to enforce any term of this Contract.

14. GOVERNING LAW

This Agreement (the Contract) and the relationship of all parties in connection with the subject matter of this agreement, and each other, shall be governed and determined in accordance with the laws of the United Kingdom (England, UK Law).

Signatures.

The Client's and the Developer's signature on this document counts as originals for all purposes.

Entire Contract.

This Contract represents the parties' final and complete understanding of this job and the subject matter discussed this Contract. This Contract supersedes all other contracts (both written and oral) between the parties. Nothing in this paragraph excludes either party's liability for fraud. The parties hereby agree to the conditions of this Contract as evidenced by their signatures below:
